SUMMARY

AI Automation and Software Engineer with experience building multi-tenant SaaS platforms, CRM automations, and AI-powered workflow systems across HRIS, compliance, sales, and employee wellness domains. Skilled in React/Next.js and TypeScript on the frontend, NestJS, Laravel, PHP/Yii2, and n8n on the backend/automation layer, with experience integrating HubSpot, Supabase, Twilio, and OpenAI. Strong background in authentication, RBAC/JWT/Auth0, workflow automation, audit trails, reporting dashboards, and production-ready business processes.

PROFESSIONAL EXPERIENCE

AI Automation and Software Engineer

03/2026 – Present

AgentGenius.ai

- Built AI-powered WhatsApp chatbot and CRM sales automation systems using n8n, HubSpot, Supabase, Twilio, Google Sheets, and OpenAI APIs.
- Developed Lola v2, a production WhatsApp chatbot for multi-step workflows, session handling, confirmations, edit flows, and structured logging.
- Designed HubSpot CRM workflows and custom properties for lead management, outreach tracking, follow-up automation, reply detection, and meeting booking status.
- Created n8n workflows for CRM syncing, reply classification, human-review routing, lead tracking, closed business logs, and autonomous follow-up logic.

Software Developer

08/2025 – 02/2026

Freelance

- Developed NestJS + MongoDB REST APIs for an HR/wellness platform covering authentication, users, company management, leave, and analytics modules.
- Implemented Auth0 onboarding flows, multi-role RBAC, company-scoped queries, and secure user/company management features.
- Built leave management workflows with approval lifecycles, calendar events, balance tracking, audit logging, and company-level configuration.
- Created analytics endpoints for user actions, manager-only engagement metrics, date filtering, and activity status tracking.

Software Developer

05/2025 – 03/2026

Rapid Care Transcription UK Ltd (Rapid Care Group UK)

- Maintained a multi-tenant healthcare HRIS + compliance SaaS serving UK and AU organizations.
- Recreated legacy HRIS workflows in Laravel, Eloquent, and Livewire to improve maintainability.
- Delivered compliance/document modules including PDF versioning, acknowledgements, and audit logs.

Software Developer

10/2023 – 08/2024

Anteriore Solutions

- Built backend features for a car-auction betting platform, including authentication, wallet flows, transaction history, refunds, and admin ticketing.
- Implemented wagering and withdrawal workflows using NextAuth and MongoDB.
- Helped create an admin panel for managing auctions/users and built a web scraper to integrate partner car-auction data.

SKILLS

- Languages: JavaScript/TypeScript, PHP
