SUMMARY

Software Developer and AI Automation Engineer experienced in full-stack recruitment platforms, multi-tenant SaaS, CRM automation, and AI-powered workflows. Skilled in Vue/Nuxt, React/Next.js, TypeScript, Fastify, NestJS, Laravel, Supabase, and n8n. Uses structured agentic AI workflows for planning, implementation, testing, review, and technical documentation while delivering secure, production-ready business systems.

PROFESSIONAL EXPERIENCE

Software Developer 06/2026 - Present
REMIE Australia
- Develop full-stack recruitment and workforce-management features across Vue 3/Nuxt applications, a TypeScript/Fastify API, Supabase, and background workers.
- Rebuilt REMIE Australia's 2023 website from the ground up, modernizing its UI, color system, information architecture, and content flow to create a more human and marketing-focused brand experience.
- Build job lifecycle, applicant-pool, Kanban, application-review, onboarding, access-control, and administrative workflows across multiple REMIE repositories.
- Utilize agentic AI development workflows with repository-specific guides, PRDs, structured handovers, test-first implementation, mutation checks, browser validation, and documented quality gates.
- Implement secure APIs, database migrations, validation, RBAC, asynchronous processing, automated tests, and responsive public and internal interfaces.

AI Automation and Software Engineer 03/2026 - 06/2026
AgentGenius.ai
- Built AI-powered WhatsApp chatbot and CRM sales automation systems using n8n, HubSpot, Supabase, Twilio, Google Sheets, and OpenAI APIs.
- Developed multi-step chatbot, lead-management, follow-up, reply-classification, human-review, meeting-booking, and structured-logging workflows.
- Executed a large-scale migration of approximately 365,000 legal documents from Microsoft OneDrive and SharePoint to Clio using custom migration tooling and platform integrations.

Software Developer 08/2025 - 02/2026
Freelance
- Developed NestJS and MongoDB APIs for an HR and wellness platform covering authentication, users, companies, leave, and analytics.
- Implemented Auth0 onboarding, multi-role RBAC, company-scoped access, approval lifecycles, calendar events, balance tracking, and audit logging.

Software Developer 05/2025 - 03/2026
Rapid Care Transcription UK Ltd (Rapid Care Group UK)
- Maintained a multi-tenant healthcare HRIS and compliance SaaS for UK and Australian organizations using Laravel, Eloquent, and Livewire.
- Delivered compliance and document modules with PDF versioning, acknowledgements, and audit trails.

Software Developer 10/2023 - 08/2024
Anteriore Solutions
- Built authentication, wallet, transaction, refund, withdrawal, auction, and admin workflows for a car-auction betting platform using Next.js and MongoDB.
- Created a partner-auction web scraper and supporting administration features.
